

FreeDive/Snorkel SILFRA MEDICAL STATEMENT

To be read and signed by each participant

Remove Watermark Now

Snorkeling in Silfra is a beautiful experience that we love to share with everyone. However, it is a demanding activity that can lead to overexertion and exhaustion. It is also important to understand that exposure to near freezing point glacial melt water includes potential hazards. To minimize the risks involved in this activity, we request that every potential participant read and fill out this form carefully. Your safety is our primary concern!

Please be aware that there have been serious incidents at Silfra involving participants in the medical risk groups identified in this release. A full YES or NO answer must be given to each of the medical conditions listed on the right hand side.

Please be aware of the following conditions related to Freediving/snorkeling in Silfra:

- Participants wear a tight and constricting full body suit. The suit is heavy and may make walking difficult.
- Because of the geographical layout of Silfra, participants must walk in full gear about 150 meters to the entry point and later 350 meters from the exit stairs back to where the tour started.
- In-water duration is 30-40 minutes and the water temperature is 2° Celsius. For this reason, participants should have eaten breakfast or lunch before the activity starts.
- Participants wear a neoprene hood and semi-dry neoprene gloves. This means that the heads and hands are exposed to the water. Part of the face will not be covered by the hood and therefore be in direct contact with the water.
- There is a slight current in Silfra and participants must be comfortable swimming against it during the last part of the tour.
- Whenever entering the water there is a small chance of the suit leaking. In this case 2° Celsius water will enter the suit and the water will be in direct contact with the skin.
- Participants use a snorkel to breathe throughout the activity. This is a breathing tube with one end in the water and the other in the air.
- Silfra is situated in the Þingvellir national park. This is a UNESCO World Heritage Area and new constructions are not allowed. This means that participants change in potentially wet, windy, and cold weather conditions. In winter, outside temperatures in Iceland may be far below the freezing point.
- Participants should bring adequate thermal protection for the time before and after the dive and keep in mind that the weather in Iceland may change within minutes. Participants should be sure to have a hat and gloves along during winter!
- Participants cannot wear most types of jewelry in the water. Participants should leave accessories not needed on tour at their accommodation so that they do not get lost.

Please answer YES or NO to the following questions about your past and present medical history.

Section 1: Do any of the following apply to you? A YES in this section means that unfortunately we cannot take you on our freedive/snorkeling tour. This is for your own safety!

- Any kind of heart disease?
- Heart attack?
- Angina, heart surgery, or blood vessel surgery?
- Inability to perform moderate exercise (walk 1 mile/1.6 km within 12 minutes)?
- Are you pregnant?
- Any form of lung disease?
- Pneumothorax (collapsed lung), other chest disease or chest surgery?
- Epilepsy, seizures, convulsions or take medications to prevent them?

Section 2: Do any of the following apply to you? A YES in this section means that you need to get medical clearance from a doctor in order to participate in the tour. The required medical is on page two of this document.

- Currently taking prescription medications? (with the exception of birth control or anti-malarial)
- High blood pressure or taking medication to control blood pressure?
- Diabetes mellitus, even if controlled by diet alone?
- Asthma, or wheezing with breathing or wheezing with exercise?
- Vertigo/dizziness, blackouts or fainting (full/partial loss of consciousness)?
- Cancer or cancer treatment within the last 5 years?
- Head injury with loss of consciousness in the last 5 years?
- Bleeding or other blood disorders?
- Age 45 or older AND can answer yes to one or more of the following?
 - Currently smoke a pipe, cigars or cigarettes
 - Have a high cholesterol
 - Have a family history of heart attack or stroke
 - Are currently receiving medical care
- Age 60 or older?

I fully understand the content of this form and the information I have provided about my medical history and fitness is accurate to the best of my knowledge. I accept responsibility for omissions that are a result of my failure to disclose any existing or past medical health condition/s.

Participant Name _____

Dear Physician,

The above patient of yours wishes to participate in a snorkeling tour with FREEDIVE.IS in Iceland, but has answered YES to the question _____ in Section 2 on the preceding page. Your assessment of the individual's fitness for the tour is therefore required.

Please note that there have been serious medical incidents in Silfra involving participants in the risk groups identified in Section 1 and Section 2 on the preceding page.

Snorkeling/ freedive in Silfra includes the following:

- Participants wear a tight and constricting full body suit. The suit is heavy and may make walking difficult.
- Participants must walk in full gear about 150 meters to the entry point and later 350 meters from the exit stairs back to where the tour started.
- The suit has seals on the neck and wrists that stop water from getting in. These can be tight and sometimes an additional rubber strap needs to be worn around the neck.
- In-water duration is 30-40 minutes and the water temperature is 2° Celsius.
- The heads and hands of participants are exposed to the 2° Celsius water through a mitigating material. Part of the face is not covered by the hood and will therefore be in direct contact with the water.
- There is a slight current in Silfra and participants must be able to swim against it during the last part of the tour.
- Whenever entering the water there is a small chance of the suit leaking. In this case 2° Celsius water will enter the suit and the water will be in direct contact with the skin.
- Participants use a snorkel to breathe throughout the activity. This is a breathing tube with one end in the water and the other in the air.
- Participants change in our natures in potentially wet, windy and cold weather conditions. In winter, outside temperatures in Iceland may be far below the freezing point.

Physician's Impression

I find no medical conditions that I consider incompatible with the activity described above.

I am unable to recommend this individual for the activity described above.
